

Hermann Fading flew an ASK 14 motorglider powered by an OS 140 twin 4-stroke with a self-starter. He would take off, fly for a while, then land dead stick. Then he would start the motor and taxi back. This scratch-built motorglider, seen in flight at left, spanned 5 meters (16 feet) and was by far the best I've ever seen -- an excellent performer and very attractive.
